PROFESSIONAL SUMMARY

Senior Full Stack & AI Engineer with 12+ years of experience building and evolving production web platforms, distributed backend services, and AI-enabled applications. Strong hands-on background in **Python, Node.js, JavaScript/TypeScript, Django, FastAPI, NestJS, Express.js, React.js, Next.js, Vue.js,** and **Angular.js.** Experienced in designing secure **APIs, microservices, event-driven workflows, data-intensive systems,** and cloud-native deployments across **AWS, Azure,** and **GCP**. Skilled in integrating **LLM APIs,** retrieval-augmented generation, and automation into existing products while maintaining a strong focus on scalability, code quality, observability, security, testing, and dependable production delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL
Frontend: React.js, Vue.js, Angular.js, Next.js, Redux, Tailwind CSS, Bootstrap, Material UI, HTML5, CSS3, Responsive UI, Figma
Backend: Node.js, Express.js, NestJS, Django, Django REST Framework, FastAPI, REST APIs, GraphQL, Web Services, API Integration
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Data Modeling, Query Optimization
Cloud & DevOps: AWS, Azure, Google Cloud (GCP), DigitalOcean, Docker, Kubernetes, Ansible, Terraform, CI/CD, Automated Deployment, Serverless Architecture
Architecture: Microservices, Event-Driven Architecture, Scalable Solutions, Serverless Architecture, API Design
AI / ML: LLM APIs, OpenAI, Azure OpenAI, Anthropic-style patterns, RAG, GenAI, AI-powered applications
Testing & Tools: Jest, Vitest, Playwright, Cypress, Pytest, Unit/Integration Testing, OAuth 2.0, JWT, RBAC, OWASP
APIs & Messaging: REST, GraphQL, Webhooks, RabbitMQ, Kafka, Third-party API Integrations

PROFESSIONAL EXPERIENCE

Sopra Steria | Senior Full-Stack Engineer / AI Engineer

01/2022 – Present | Paris, France

- Own technical delivery of full-stack and AI-enabled product capabilities using **TypeScript, Python, Node.js, React.js, Next.js, Django, FastAPI,** and **NestJS.**
- Engineer reusable, responsive frontend experiences with **React.js, Vue.js, Angular.js, Redux, Tailwind CSS,** and **Material UI,** emphasizing maintainability and accessibility.
- Develop backend services with **Node.js, Express.js, NestJS, Fastify, FastAPI,** and **Django,** separating business logic into scalable service boundaries.
- Define **REST** and **GraphQL** contracts, authentication flows, webhooks, and integration patterns used by internal applications and third-party platforms.
- Integrate **OpenAI, Azure OpenAI,** and other **LLM** capabilities into production features using retrieval-augmented generation, prompt orchestration, and structured outputs.
- Build asynchronous and event-driven processing flows with **RabbitMQ, Kafka, Docker**-based services, and API-driven communication between distributed components.
- Create document-search and contextual AI workflows that connect enterprise data sources with retrieval, generation, and business-process automation.
- Model and maintain application data across **PostgreSQL, MySQL, SQL Server,** and **MongoDB,** improving indexes, query patterns, and data-access efficiency.
- Diagnose performance constraints across frontend, APIs, and databases and apply caching, asynchronous processing, query tuning, and rendering optimizations.
- Deliver cloud-native workloads across **AWS, Azure,** and **GCP** using **Docker, Kubernetes, Terraform, Ansible,** and automated deployment pipelines.
- Maintain automated quality gates with **Jest, Vitest, Pytest, Playwright,** and **Cypress** across unit, integration, API, and end-to-end test layers.
- Apply **OAuth 2.0, JWT, RBAC**, **secure API** patterns, and **OWASP-aligned** practices to protect application and integration surfaces.
- Support production systems through monitoring, troubleshooting, root-cause analysis, release support, and reliability improvements across the application lifecycle.
- Guide architecture discussions, code reviews, engineering standards, and technical tradeoffs while mentoring developers and partnering with product stakeholders.

Devoteam | Software Engineer / AI Engineer

01/2019 – 12/2021 | Levallois-Perret, France

- Took ownership of technical design and implementation for customer-facing and internal software features from planning through production support.
- Developed backend APIs, service components, and microservice integrations for business applications with demanding data and workflow requirements.
- Built application services using **Python, FastAPI, Django, JavaScript, TypeScript, Node.js,** and **NestJS** with an emphasis on maintainable backend architecture.
- Delivered web interfaces with React, **Next.js, TypeScript, HTML,** and **CSS,** connecting frontend workflows to secure backend services.
- Designed database schemas and optimized application queries across S**QL Server, MySQL,** and **MongoDB** for reliable data access and reporting workflows.

▪ Supported application hosting and deployment on AWS and Azure, including environment configuration, service integration, and release troubleshooting.
▪ Improved delivery consistency through automated build, test, and deployment workflows using GitHub-based **CI/CD** and **DevOps** practices.
▪ Added AI-assisted application functionality and automation using **Python, Django, LLM integrations,** backend APIs, and structured business workflows.

Capgemini | Software Engineer
01/2017 – 12/2018 | Paris, France

▪ Implemented full-stack product features with **Python, FastAPI, JavaScript, TypeScript, Node.js, React,** and **Next.js** across multiple application layers.
▪ Developed **REST APIs** and backend services for modular and distributed systems, contributing to service decomposition and integration design.
▪ Worked with **MySQL, PostgreSQL, SQL Server**, and **MongoDB** to model application data, troubleshoot queries, and support data-driven features.
▪ Packaged and deployed applications with **Docker, AWS services, CI/CD pipelines**, and automated release workflows.
▪ Connected applications with external APIs, CRM platforms, authentication services, and emerging AI capabilities through secure integration layers.
▪ Participated in architecture reviews, peer code reviews, testing, debugging, Agile delivery, and ongoing support of production applications.

Adobe | Software Developer Intern
08/2014 – 12/2016 | San Jose, CA, United States

▪ Contributed to full-stack application development using **JavaScript, TypeScript, Python, Node.js, React, Git,** and automated delivery workflows.
▪ Implemented REST endpoints and backend functionality supporting core application workflows and integration requirements.
▪ Built and refined responsive web interfaces with **JavaScript, TypeScript, HTML5, CSS3,** and modern component-based frontend practices.

EDUCATION

Bachelor's Degree in Computer Science | University of California, Berkeley | 08/2012 – 06/2016

LANGUAGES

English: Advanced / Fully Working Proficient (C1)
